

Equipment Prep & Pack for Shipment Agreement

Equipment being packaged for shipment: _____

List the parts and accessories you've included: _____

List known parts and accessories missing: _____

Packaging Guidelines Check-off (All boxes must be checked)

**** Equipment must be packed to withstand standard shipper's abuse, including drops of up to 3-4 feet ****

- 1) Select a sturdy box 6" longer, wider and higher than the item to be shipped. Box should be double-walled and undamaged
- 2) Remove or cross out any old shipping labels and barcodes
- 3) Wrap all sides of item with at least 3" of Bubble Wrap cushioning
- 4) Protect all sharp edges/corners with styrofoam or 4-6 layers of cardboard fitted to the edge/corner
- 5) Center primary item within packaging
- 6) Package any and all accessories individually to protect from damage and/or loss
- 7) Fill any remaining open space around packaged item and inside wall of box with bubble wrap or loose fill peanuts
Do not use paper products for packaging
- 8) Use pressure-sensitive plastic tape at least 2" wide to seal all seams of box using the "H" taping method
- 9) Prior to sealing, place a business card or your letterhead with your name and contact phone number inside the box

If you are unable to package according to all guidelines shown above, it is your responsibility to have the equipment professionally packaged at a FedEx/Kinkos, Pak 'n Mail, Pak 'n Ship or (as a last resort) a UPS Store, according to the Guidelines shown above.

I take responsibility that the equipment being shipped has been packaged according to all Guidelines shown above so that it will arrive in its original, undamaged condition. If the equipment was not packaged according to these Guidelines and the equipment arrives in a damaged condition, I agree that apexx will not be held responsible for any repair and/or replacement costs.
